

ON-DEMAND

# Navigate from NAV to Business Central

The Professional Advantage NAV to Business Central panel discussion.

**Microsoft NAV** has successfully served its worldwide users as an ERP system for decades. However, as business needs change, so do the technologies that support them, and subsequently, NAV 2018 spells the end of an era for NAV on-premises deployments.

**Why is this important?** You have reached a decision point: either stay where you are with NAV on-premises, or transition to **Microsoft Dynamics 365 Business Central** in Azure.

The prospect of transitioning from your trusted NAV solution to Business Central can be daunting, but it doesn't need to be.

Join Professional Advantage to discover some of the reasons as to why you should consider this transition, and to hear just how simple it can be. In this panel discussion webinar, we brought together some of our best Business Central minds to talk through:

The key benefits of moving from NAV to Business Central.

What is the process?

The technology considerations.

How to work out the ROI and associated costs.

We were delighted to host this webinar as a live panel discussion. Attendees asked the important questions they needed answering and presented them to our team of experts.

## Meet Our Presenters

**Rebecca Gatehouse**  
Business Development Manager

*"Being on Business Central allows you to align your ERP to the rest of the technology you are using, and take advantage of it."*

Rebecca is dedicated to helping organisations improve via the application of technology. With an understanding of their organisation, roadmap of improvements, and target business outcomes, Rebecca advises on best approach and technologies that will deliver outcomes. Rebecca has over 12 years of experience working with customers to find, and get the most out of, the best technology to support their business.

**Keith Asher**  
Client Success Manager

*"You have a total cohesive system end-to-end."*

Keith has over 40 years of experience within the IT sector, and 16 of those have been spent working specifically with Microsoft ERP practices. He is an experienced strategic manager involved in the development and execution of organisation plans focussed upon delivering key business outcomes.

**Sammy Pinkus**  
Senior Business Central Consultant

*"Headaches be gone! All the popular tools and features that were in NAV are still in Business Central."*

Sammy has been solving business problems for over 35 years through innovative thinking, consultation, and software development. He was one of the first Australians to be trained in Dynamics NAV more than two decades ago, working with NAV/Business Central ever since, and has been appointed by Microsoft to be Australia's 'Lead Microsoft Certifies Trainer' in Dynamics. He has implemented and supported NAV/Business Central sites internationally, and across industries including travel, warehousing/distribution, importing, and not-for-profits.
