

HELPING ORGANISATIONS *achieve more* WITH TECHNOLOGY

Hi Emma,

Thank you for joining **ACE 2021 Reimagined**. We hope you enjoyed the virtual conference.

At Professional Advantage we have helped many member-based organisations to streamline operations and manage daily tasks. It is not uncommon for organisations to use several software applications to run different parts of their operations. This usually entails manual tasks, time-consuming reconciliations between systems, and lengthy reporting processes managed in Excel spreadsheets.

How can technology support smoother operations for your association, and what good qualities should you look for in a system that will help deliver valuable benefits for your organisation?

We invite you to take our [AMS Readiness Assessment](#) for us to learn a little more about your challenges and current processes. Then receive a complimentary 1-hour consultation with one of our experienced association experts where we provide insight and offer recommendations on how you can improve your processes.

If you have questions, please don't hesitate to contact us at enquiries@pa.com.au or 1800 126 499.

You may also visit [Professional Advantage](#) website to know more about us.

Looking forward to speaking soon,

Robert Mete & Dennis Dalla Costa
