

WEBINAR

Introducing Dynamics 365 Fundraising & Engagement for not-for-profits

Wednesday 29th September
12:30 PM - 1:15 PM (AEST)

pa.com.au/events

Hi Emma,

Do you use disconnected apps that make it challenging to manage different parts of the fundraising lifecycle?

Do you find it hard to personalise engagements with your loyal and prospective donors?

If you do, then your not-for-profit can benefit from a smart, modern, and efficient tool to optimise your fundraising function.

Meet **Microsoft Dynamics 365 Fundraising and Engagement** for not-for-profits at our upcoming webinar and learn how to combat your fundraising and donor engagement challenges in these ways:

1. Get a 360 degree view of your donors and manage the full fundraising lifecycle.
2. Support common fundraising scenarios across different donation types and channels.
3. Use a single platform for development, marketing, fundraising, and related financial processes.
4. Benefit from the native integration of Dynamics 365 F&E with the Office tools you already know and love.
5. Take action when key events happen by receiving instant alerts.
6. Gain deeper insight into donors and financial outcomes with Power BI.
